INDEX TO VOLUME IX

Acid-forming streptococci as indices of fomites pollution..... 513
Acids, The character of, produced by hemolytic and non-hemolytic streptococci from pathogenic sources and from milk..... 79
Aerobic growth, The number of generations necessary for the development of the power of, by *Bacterium abortus* (Bang)..... 273
Agar cylinders, Experimental method for the cultivation of microbes in, in the peritoneal cavity of animals..... 427
Albus, William R., and Sherman, James M. The function of lag in bacterial cultures..... 303
Amino-acid nitrogen as applied to the study of bacterial cultures, The Van Slyke method for the determination of..... 307
Anaerobic bacteria, A morphological, cultural and biochemical study of representative spore-forming..... 13
Antigenic relationships of *Bact. typhosum*. II. Complement fixation..... 409
Autoclave, Coagulation and sterilization of Loeffler's medium in the..... 179
Ayers, S. Henry, and Johnson, W. T., Jr. Studies on pasteurization. XI. The "majority" and "absolute" thermal deathpoints of bacteria in relation to pasteurization..... 279
Ayers, S. Henry, and Johnson, W. T., Jr. Studies on pasteurization. XII. Cause and significance of pin-point colonies from pasteurized milk..... 285
Ayers, S. Henry, and Johnson, William T., Jr. Studies of the streptococci. VII. A medium for stock cultures of streptococci and other bacteria..... 111
Ayers, S. Henry, and Johnson, William T., Jr. Studies of the streptococci. VIII. A note on hydrogen-sulphid production by streptococci..... 115

Bacillus botulinus, The detection of, and *Bacillus tetani* in soil samples by the constricted tube method..... 201
Bacillus prodigiosus, The type species of the genus *Serratia*, commonly known as..... 545
Bacillus tetani, The detection of *Bacillus botulinus* and, in soil samples by the constricted tube method..... 201
Bact. typhosum, Antigenic relationships of. II. Complement fixation..... 409
Bacteria, The discoloration of brain medium by anaerobic..... 211
——, Further observations on liquefaction of gelatin by..... 225
——, The "majority" and "absolute" thermal deathpoints of, in relation to pasteurization. Studies on pasteurization XI..... 279
——, A medium for stock cultures of streptococci and other. Studies of the streptococci VII..... 111
——, A morphological, cultural and biochemical study of representative spore-forming anaerobic..... 13
——, The motility of, as affected by hydrogen ion concentrations..... 119

Bacteria, The Ostwald viscosimeter for the determination of the liquefaction of gelatin by..... 315
——, the penetration of, through capillary spaces. II. Migration through sand..... 143
——, The penetration of, through capillary spaces. III. Transport through Berkefeld filters by electroendosmotic streaming..... 151
——, Spore-bearing, in heated milk, A study of the decomposition products of..... 1
Bacterial association, A study of a. I. The biochemistry of the production of lactic acid..... 183
—— behavior, The chemical mechanism of. I. Behavior toward dyes. Factors controlling the Gram reaction..... 463
—— behavior, The chemical mechanism of. II. A new theory of the Gram reaction..... 479
—— behavior, The chemical mechanism of. III. The problem of bacteriostasis..... 491
—— cultures, The function of lag in..... 303
—— cultures, Hydrogen sulfide determination in, and in certain canned foods..... 235
—— cultures, The Van Slyke method for the determination of amino-acid nitrogen as applied to the study of..... 307
——, A, disease of silkworms..... 339
Bacteriological flora of a sewage treatment plant, A survey of the. Studies on the biology of sewage disposal..... 437
—— population, A sprinkling filter bed and its. Studies on the biology of sewage disposal..... 455
Bacteriology, Some questions of method in..... 95
Bacteriophage, A method of staining lytic areas produced by the..... 405
Bacteriostasis, The problem of. The chemical mechanism of bacterial behavior. III..... 491
Bacterium abortus (Bang), The number of generations necessary for the development of the power of aerobic growth by..... 273
Bacterium coli, The effect of some electrolytes on the buffering power of... 559
Bacterium typhosum, The effect of environmental changes on the growth, morphology, physiology and immunological characteristics of..... 581
Bakers' yeast, The fate of, in the intestine of man and of the white rat..... 327
Bartolomeo Bizio's letter to the most eminent priest, Angelo Bellani, concerning the phenomenon of the red-colored polenta. (Translated from the Italian)..... 527
Berkefeld filters, Transport through, by electroendosmotic streaming. The penetration of bacteria through capillary spaces. III..... 151
Biochemistry, The, of the production of lactic acid. A study of a bacterial association. I..... 183
Brain medium, The discoloration of, by anaerobic bacteria..... 211
Breed, Margaret E. and Breed, R. S. The type species of the genus *Serratia*, commonly known as *Bacillus prodigiosus*..... 545
Breed, R. S. and Breed, Margaret E. The type species of the genus *Serratia*, commonly known as *Bacillus prodigiosus*..... 545

Broadhurst, Jean. Heating to facilitate measurement of precipitates..... 511
Buffering power of *Bacterium coli*. The effect of some electrolytes on the.. 559

Canned foods, Hydrogen sulfide determination in bacterial cultures and in certain..... 235
Capillary spaces, The penetration of bacteria through. II. Migration through sand..... 143
—— ——, The penetration of bacteria through. III. Transport through Berkefeld filters by electroendosmotic streaming..... 151
Character, The, of acids produced by hemolytic and non-hemolytic streptococci from pathogenic sources and from milk..... 79
Chemical, The, mechanism of bacterial behavior. I. Behavior toward dyes. Factors controlling the Gram reaction..... 463
——, The, mechanism of bacterial behavior. II. A new theory of the Gram reaction..... 479
——, The, mechanism of bacterial behavior. III. The problem of bacteriostasis..... 491
Citrate utilization by members of the colon-aerogenes group with other differential characteristics and with habitat, correlation of..... 59
Clark, E. D., Fellers, C. R., and Shostrom, O. E. Hydrogen sulfide determination in bacterial cultures and in certain canned foods..... 235
Clostridium putrificum. III. A comparison of strains obtained from collections in this country and abroad..... 321
Coagulation and sterilization of Loeffler's medium in the autoclave..... 179
Colon-aerogenes group, Correlation of citrate utilization by members of the, with other differential characteristics and with habitat..... 59
Comparative study of *Lactobacillus acidophilus* and *Lactobacillus bulgaricus*. 357
Complement fixation. Antigenic relationships of *Bact. typhosum*. II..... 409
Constricted tube method, The detection of *Bacillus botulinus* and *Bacillus tetani* in soil samples by the..... 201
Coolhaas, C. and Söhngen, N. L. The fermentation of galactose by *Saccharomyces cerevisiae*..... 131
Correlation of citrate utilization by members of the colon-aerogenes group with other differential characteristics and with habitat..... 59

Decomposition products of spore-bearing bacteria in heated milk, A study of..... 1
Description, A, of a self-ventilating constant temperature incubator room. 169
Detection, The, of *Bacillus botulinus* and *Bacillus tetani* in soil samples by the constricted tube method..... 201
Discoloration, The, of brain medium by anaerobic bacteria..... 211
Duodenal tube, A note on a simple method for obtaining uncontaminated samples of intestinal contents from various levels with a..... 301
Dupray, Martin. Coagulation and sterilization of Loeffler's medium in the autoclave..... 179
Dyes, Behavior toward. Factors controlling the Gram reaction. The chemical mechanism of bacterial behavior. I..... 463

Effect, The, of environmental changes on the growth, morphology, physiology and immunological characteristics of *Bacterium typhosum*..... 581
——, The, of some electrolytes on the buffering power of *Bacterium coli*.... 559
Electroendosmotic streaming, Transport through Berkefeld filters by. The penetration of bacteria through capillary spaces. III..... 151
Electrolytes, The effect of some, on the buffering power of *Bacterium coli*.. 559
Environmental changes, The effect of, on the growth, morphology, physiology and immunological characteristics of *Bacterium typhosum*..... 581
Enzymes, The quantitative action of, of seven specific organisms upon the proteins of milk and upon gelatin..... 123
Experimental method for the cultivation of microbes in agar cylinders in the peritoneal cavity of animals..... 427

Falk, I. S. and Shaughnessy, H. J. The effect of some electrolytes on the buffering power of *Bacterium coli*..... 559
Fate, The, of bakers' yeast in the intestine of man and of the white rat.... 327
Fellers, C. R., Shostrom, O. E. and Clark, E. D. Hydrogen sulfide determination in bacterial cultures and in certain canned foods..... 235
Felton, Lloyd D. A description of a self-ventilating constant temperature incubator room..... 169
Fermentation, The, of galactose by *Saccharomyces cerevisiae*..... 131
Fomites pollution, Acid-forming streptococci as indices of..... 513
Freeman, R. G., Jr. and Miller, E. G., Jr. A note on a simple method for obtaining uncontaminated samples of intestinal contents from various levels with a duodenal tube..... 301
Function, The, of lag in bacterial cultures..... 303
Further observations on liquefaction of gelatin by bacteria..... 225

Galactose, The fermentation of, by *Saccharomyces cerevisiae*..... 131
Gelatin, Further observations on liquefaction of, by bacteria..... 225
——, The Ostwald viscosimeter for the determination of the liquefaction of, by bacteria..... 315
——, The quantitative action of enzymes of seven specific organisms upon the proteins of milk and upon..... 123
Glaser, R. W. A bacterial disease of silkworms..... 339
Gowda, R. Nagan. Nitrification and the nitrifying organisms. I..... 251
Gram reaction, Factors controlling the. The chemical mechanism of bacterial behavior. I. Behavior toward dyes..... 463
—— reaction, A new theory of the. The chemical mechanism of bacterial behavior. II..... 479
Growth, The effect of environmental changes on the, morphology, physiology and immunological characteristics of *Bacterium typhosum*..... 581

Hadley, Philip. A method of staining lytic areas produced by the bacteriophage..... 405
——, ——. The variation in size of lytic areas and its significance..... 397
Hall, Ivan C., and Peterson, Emelia C. The detection of *Bacillus botulinus* and *Bacillus tetani* in soil samples by the constricted tube method..... 201

Hall, Ivan C., and Peterson, Emelia, C. The discoloration of brain medium by anaerobic bacteria..... 211
Harms, Amanda. The number of generations necessary for the development of the power of aerobic growth by *Bacterium abortus* (Bang)..... 273
Hastings, E. G. Some questions of method in bacteriology..... 95
Heating to facilitate measurement of precipitates..... 511
Hemolytic and non-hemolytic streptococci from pathogenic sources and from milk, The character of acids produced by..... 79
Hotchkiss, Margaret. Studies on the biology of sewage disposal. A sprinkling filter bed and its bacteriological population..... 455
——, ——. Studies on the biology of sewage disposal. A survey of the bacteriological flora of a sewage treatment plant..... 437
Hydrogen ion concentrations, The motility of bacteria as affected by..... 119
—— sulfide determination in bacterial cultures and in certain canned foods. 235
—— -sulphid production by streptococci, A note on. Studies of the streptococci. VIII..... 115

Immunological characteristics of *Bacterium typhosum*, The effect of environmental changes on the growth, morphology, physiology and..... 581
Incubator room, A description of a self-ventilating constant temperature.. 169
Intestinal contents, A note on a simple method for obtaining uncontaminated samples of, from various levels with a duodenal tube..... 301

Johnson, W. T., Jr. and Ayers, S. Henry. Studies on pasteurization. XI. The "majority" and "absolute" thermal deathpoints of bacteria in relation to pasteurization..... 279
——, ——, —— and —— —— ——. Studies on pasteurization. XII. Cause and significance of pin-point colonies from pasteurized milk..... 285
Johnson, William T. Jr. and Ayers, S. Henry. Studies of the streptococci. VII. A medium for stock cultures of streptococci and other bacteria.. 111
—— —— —— and ——, —— ——. Studies of the streptococci. VIII. A note on hydrogen-sulphid production by streptococci..... 115

Koser, Stewart A. Correlation of citrate utilization by members of the colon-aerogenes group with other differential characteristics and with habitat..... 59
Kulp, Walter L., and Rettger, Leo F. Comparative study of *Lactobacillus acidophilus* and *Lactobacillus bulgaricus*..... 357

Lactic acid, The biochemistry of the production of. A study of a bacterial association. I..... 183
Lactobacillus acidophilus and *Lactobacillus bulgaricus*, Comparative study of..... 357
Lactobacillus bulgaricus, Comparative study of *Lactobacillus acidophilus* and. 357
Lag, The function of, in bacterial cultures..... 303
Lamson, R. W. The Van Slyke method for the determination of amino-acid nitrogen as applied to the study of bacterial cultures..... 307

Langwill, Bertha. The character of acids produced by hemolytic and non-hemolytic streptococci from pathogenic sources and from milk..... 79
Levine, Max and Shaw, F. W. Further observations on liquefaction of gelatin by bacteria..... 225
Liquefaction of gelatin by bacteria, Further observations on..... 225
Lisk, Henrietta. A study of the decomposition products of spore-bearing bacteria in heated milk..... 1
Loeffler's medium, Coagulation and sterilization of, in the autoclave..... 179
Lytic areas, A method of staining, produced by the bacteriophage..... 405
—— ——, The variation in size of, and its significance..... 397

MacLeod, D. J. and Reed, Guilford. The motility of bacteria as affected by hydrogen ion concentrations..... 119
McAlpine, James G., Rettger, Leo F. and Reddish, George F. The fate of bakers' yeast in the intestine of man and of the white rat..... 327
Medium, A, for stock cultures of streptococci and other bacteria. Studies of the streptococci. VII..... 111
Merlino, C. P. Bartolomeo Bizio's letter to the most eminent priest, Angelo Bellani, concerning the phenomenon of the red-colored polenta. (Translated from the Italian)..... 527
Method, A, of staining lytic areas produced by the bacteriophage..... 405
——, Some questions of, in bacteriology..... 95
Microbes, Experimental method for the cultivation of, in agar cylinders in the peritoneal cavity of animals..... 427
Migration through sand, The penetration of bacteria through capillary spaces. II..... 143
Milk, The character of acids produced by hemolytic and non-hemolytic streptococci from pathogenic sources and from..... 79
——, pasteurized, Cause and significance of pin-point colonies from. Studies on pasteurization XII..... 285
——, The quantitative action of enzymes of seven specific organisms upon the proteins of, and upon gelatin..... 123
——, A study of the decomposition products of spore-bearing bacteria in heated..... 1
Miller, E. G., Jr. and Freeman, R. G., Jr. A note on a simple method for obtaining uncontaminated samples of intestinal contents from various levels with a duodenal tube..... 301
Morphological, A, cultural and biochemical study of representative spore-forming anaerobic bacteria..... 13
Morphology, The effect of environmental changes on the growth, —, physiology and immunological characteristics of *Bacterium typhosum*..... 581
Motility, The, of bacteria as affected by hydrogen ion concentrations..... 119
Mudd, Stuart. The penetration of bacteria through capillary spaces. III. Transport through Berkefeld filters by electroendosmotic streaming... 151
——, —— and Warren, Shields. The penetration of bacteria through capillary spaces. II. Migration through sand..... 143

Nitrification and the nitrifying organisms. I..... 251

Nitrifying organisms, Nitrification and the. I..... 251
Note, A, on a simple method for obtaining uncontaminated samples of intestinal contents from various levels with a duodenal tube..... 301
Number, The, of generations necessary for the development of the power of aerobic growth by *Bacterium abortus* (Bang)..... 273

Ørskov, J. Experimental method for the cultivation of microbes in agar cylinders in the peritoneal cavity of animals..... 427
Ostwald, The, viscosimeter for the determination of the liquefaction of gelatin by bacteria..... 315

Parfitt, E. H. and Spitzer, George. The quantitative action of enzymes of seven specific organisms upon the proteins of milk and upon gelatin.... 123
Pasteurization, The "majority" and "absolute" deathpoints of bacteria in relation to. Studies on pasteurization XI..... 279
——, Studies on. XI. The "majority" and "absolute" thermal deathpoints of bacteria in relation to pasteurization..... 279
Pasteurized milk, Cause and significance of pin-point colonies from. Studies on pasteurization XII..... 285
Penetration, The, of bacteria through capillary spaces. II. Migration through sand..... 143
——, The, of bacteria through capillary spaces. III. Transport through Berkefeld filters by electroendosmotic streaming..... 151
Peterson, Emelia C. and Hall, Ivan C. The detection of *Bacillus botulinus* and *Bacillus tetani* in soil samples by the constricted tube method.... 201
——, —— and ——, ——. The discoloration of brain medium by anaerobic bacteria..... 211
Phenomenon of the red-colored polenta. Bartolomeo Bizio's letter to the most eminent priest, Angelo Bellani, concerning the. (Translated from the Italian)..... 527
Phillips, J. F. and Speakman, H. B. A study of bacterial association. I. The biochemistry of the production of lactic acid..... 183
Physiology, The effect of environmental changes on the growth, morphology, —, and immunological characteristics of *Bacterium typhosum*..... 581
Pin-point colonies from pasteurized milk. Cause and significance of. Studies on pasteurization XII..... 285
Polenta, the red-colored, Bartolomeo Bizio's letter to the most eminent priest, Angelo Bellani, concerning the phenomenon of. (Translated from the Italian)..... 527
Precipitates, Heating to facilitate measurement of..... 511
Proteins of milk, The quantitative action of enzymes of seven specific organisms upon, and upon gelatin..... 123

Quantitative, The, action of enzymes of seven specific organisms upon the proteins of milk and upon gelatin..... 123

Reddish, George F. *Clostridium putrificum*. III. A comparison of strains obtained from collections in this country and abroad..... 321

Reddish, George F., and Rettger, Leo F. A morphological, cultural and biochemical study of representative spore-forming anaerobic bacteria..... 13
——, —— ——, ——, —— —— and McAlpine, James G. The fate of bakers' yeast in the intestine of man and of the white rat..... 327
Reed, Guilford and MacLeod, D. J. The motility of bacteria as affected by hydrogen ion concentrations..... 119
Rettger, Leo F., and Kulp, Walter L. Comparative study of *Lactobacillus acidophilus* and *Lactobacillus bulgaricus*..... 357
——, —— —— and Reddish, George F. A morphological, cultural and biochemical study of representative spore-forming anaerobic bacteria.. 13
——, —— ——, ——, —— —— and McAlpine, James G. The fate of bakers' yeast in the intestine of man and of the white rat..... 327
Robinson, Elliott Stirling. Antigenic relationships of *Bact. typhosum*. II. Complement fixation..... 409

Saccharomyces cerevisiae, The fermentation of galactose by..... 131
Sand, Migration through. The penetration of bacteria through capillary spaces. II..... 143
Sanjiyan, Dorothea H., and Winslow, C.-E. A. Acid-forming streptococci as indices of fomites pollution..... 513
Serratia, The type species of the genus, commonly known as *Bacillus prodigiosus*..... 545
Sewage disposal, Studies on the biology of. A sprinkling filter bed and its bacteriological population..... 455
—— ——, Studies on the biology of. A survey of the bacteriological flora of a sewage treatment plant..... 437
—— treatment plant A survey of the bacteriological flora of a. Studies on the biology of sewage disposal..... 437
Shaughnessy, H. J., and Falk, I. S. The effect of some electrolytes on the buffering power of *Bacterium coli*..... 559
Shaw, Frederick W. The Ostwald viscosimeter for the determination of the liquefaction of gelatin by bacteria..... 315
Shaw, F. W. and Levine, Max. Further observations on liquefaction of gelatin by bacteria..... 225
Sherman, James M., and Albus, William R. The function of lag in bacterial cultures..... 303
Shostrom, O. E., Fellers, C. R., and Clark, E. D. Hydrogen sulfide determination in bacterial cultures and in certain canned foods..... 235
Silkworms, A bacterial disease of..... 339
Söhngen, N. L. and Coolhaas, C. The fermentation of galactose by *Saccharomyces cerevisiae*..... 131
Soil samples, The detection of *Bacillus botulinus* and *Bacillus tetani* in, by the constricted tube method..... 201
Some questions of method in bacteriology..... 95
Speakman, H. B. and Phillips, J. F. A study of bacterial association. I. The biochemistry of the production of lactic acid..... 183
Spitzer, George and Parfitt, E. H. The quantitative action of enzymes of seven specific organisms upon the proteins of milk and upon gelatin.... 123

Spore-forming anaerobic bacteria, A morphological, cultural and biochemical study of representative..... 13
Sprinkling filter bed, A, and its bacteriological population. Studies on the biology of sewage disposal..... 455
Stearn, Allen E., and Stearn, Esther Wagner. The chemical mechanism of bacterial behavior. III. The problem of bacteriostasis..... 491
Stearn, Esther Wagner, and Stearn, Allen Edwin. The chemical mechanism of bacterial behavior. I. Behavior toward dyes. Factors controlling the Gram reaction..... 463
—— —— —— and —— —— ——. The chemical mechanism of bacterial behavior. II. A new theory of the Gram reaction..... 479
Sterilization, Coagulation and, of Loeffler's medium in the autoclave..... 179
Streptococci, Acid-forming, as indices of fomites pollution..... 513
Streptococci, The character of acids produced by hemolytic and non-hemolytic, from pathogenic sources and from milk..... 79
——, A medium for stock cultures of, and other bacteria. Studies of the streptococci. VII..... 111
——, A note on hydrogen-sulphid production by. Studies of the streptococci. VIII..... 115
——, Studies of the. VII. A medium for stock cultures of streptococci and other bacteria..... 111
——, Studies of the. VIII. A note on hydrogen-sulphid production by streptococci..... 115
Stuart, Charles A. The effect of environmental changes on the growth, morphology, physiology and immunological characteristics of *Bacterium typhosum*..... 581
Studies on the biology of sewage disposal. A sprinkling filter bed and its bacteriological population..... 455
—— on the biology of sewage disposal. A survey of the bacteriological flora of a sewage treatment plant..... 437
Studies on pasteurization. XI. The "majority" and "absolute" thermal deathpoints of bacteria in relation to pasteurization..... 279
—— —— ——. XII. Cause and significance of pin-point colonies from pasteurized milk..... 285
Studies of the streptococci. VII. A medium for stock cultures of streptococci and other bacteria..... 111
—— —— —— ——. VIII. A note on hydrogen-sulphid production by streptococci..... 115
Study, A, of a bacterial association. I. The biochemistry of the production of lactic acid..... 183
——, A, of the decomposition products of spore-bearing bacteria in heated milk..... 1

Thermal deathpoints of bacteria in relation to pasteurization, The "majority" and "absolute." Studies on pasteurization. XI..... 279
Type, The, species of the genus *Serratia*, commonly known as *Bacillus prodigiosus*..... 545

Van Slyke, The, method for the determination of amino-acid nitrogen as applied to the study of bacterial cultures..... 307
Variation, The, in size of lytic areas and its significance..... 397
Viscosimeter, The Ostwald, for the determination of the liquefaction of gelatin by bacteria..... 315

Warren, Shields, and Mudd, Stuart. The penetration of bacteria through capillary spaces. II. Migration through sand..... 143
Winslow, C.-E. A. and Sanjiyan, Dorothea H. Acid-forming streptococci as indices of fomites pollution..... 513

Yeast, The fate of bakers', in the intestine of man and of the white rat.... 327
